

The low-cost, high performance corn soil insecticide

SmartChoice™ 5G Insecticide

- Broad spectrum control of secondary pests as well as corn rootworms
- Maximum yields for maximum profits
- Better standability and plant health improves harvest efficiency
- Two active ingredients for consistent insect control
- Its low use rate covers a higher number of acres between refills
- SmartBox closed handling system makes application easier, more accurate
- Also available in Lock'nLoad® packaging

Produce Bigger Yields and Better Harvests with SmartChoice 5G

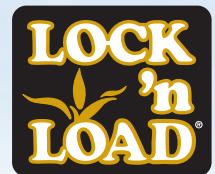

SmartChoice™ 5G insecticide from AMVAC

With the combined power of organophosphate and pyrethroid chemistries reaches far beyond seed treatments for control of secondary pests such as wireworms, grubs and seedcorn maggots, as well as enhancing the control of corn rootworms to achieve the highest yield potential of high tech hybrids. The dual modes of action help reduce risk factors during the growing season and improve standability to increase harvest efficiency and final yield results.

Two Rates to Fit Your Needs:

- 5 oz. per 1000 ft of row for full spectrum control on conventional hybrids and refuge management
- 3.5 oz. per 1000 ft of row to enhance rootworm and secondary pest control on corn rootworm tolerant hybrids.

Protect your corn hybrid investment. Make the Smart Choice with the powerful control of SmartChoice 5G insecticide from AMVAC. For more information and to view the specimen label, go to www.smartboxsystem.com or call us at 1-888-GO-AMVAC.
